DAVID YURMAN

Single Metals

Cleaning and caring for designs made from solid gold, silver, and more

METAL TYPE	SAFE TO USE WITH JEWELRY CLEANER	CLEANING TIPS	CARE NOTES
Gold	X	Use a soft cloth to gently wipe clean, then remove any remaining impurities with mild diluted soap. Rinse with warm water and dry thoroughly before storing in the provided jewelry pouch.	
Silver		Use a soft cloth to gently wipe clean, then remove any remaining impurities with mild diluted soap. Rinse with warm water and dry thoroughly before storing in the provided jewelry pouch.	
Aluminum		Use a soft cloth to gently wipe clean, then remove any remaining impurities with mild diluted soap. Rinse with warm water and dry thoroughly before storing in the provided jewelry pouch.	Because aluminum is more fragile than other metals like sterling silver, please wear your aluminum jewelry with care to avoid scratching it. Do not bang on hard surfaces.
Black Rhodium		Use a soft cloth to gently wipe clean, then remove any remaining impurities with mild diluted soap. Rinse with warm water and dry thoroughly before storing in the provided jewelry pouch.	Black rhodium is a rare type of platinum plated over silver and gold to create a darker hue. Like any plated finish, it will fade over time and with wear. Since salt, chlorine and other solutions can damage this finish, please remove your jewelry before bathing, swimming or washing your hands.
Bronze		Clean regularly with the white side of a David Yurman polishing cloth. See care tips for additional ways to prevent tarnishing.	Bronze is an alloy made predominantly from copper. Some people may have a reaction to the metal which could slightly discolor the skin. This is harmless and can be easily washed off with soap and water. People with particularly sensitive skin may not be able to wear copper and bronze.
Copper		Use a soft cloth to gently wipe clean, then remove any remaining impurities with mild diluted soap. Rinse with warm water and dry thoroughly before storing in the provided jewelry pouch.	Copper jewelry will acquire a patina over time. To clean the naturally-produced patina, simply use a polishing cloth to remove oils and dirt. The use of anti-tarnishing paper will also help slow down the patina process.
Platinum	X	Use a soft cloth to gently wipe clean, then remove any remaining impurities with mild diluted soap. Rinse with warm water and dry thoroughly before storing in the provided jewelry pouch.	
Titanium (All Colors)		Do not use chemical jewelry cleaner. Use a very soft cloth to gently remove any tarnish, then clean with mild diluted soap. Rinse with warm water and dry thoroughly before storing the design in its jewelry pouch.	Titanium is resilient, but may show wear over time. Take care to remove jewelry at night and before exercise or intense physical activity. Avoid contact with abrasive materials.
Stainless Steel		Clean stainless steel and darkened stainless steel with warm water and mild, diluted soap. Dry thoroughly with a clean towel.	

Please note: To reduce possible reactions, remove your jewelry at night, avoid wearing during exercise or excessive sweating. Do not apply excessive lotions while wearing.

Mixed Metals

Cleaning and caring for designs made from multiple materials

METAL TYPE	MIXED WITH	CLEANING TIPS	CARE NOTES
Gold	Silver with PVD	Clean regularly by wiping with a fresh, soft cloth.	
	Silver (including blackened) Titanium (Black, Silver, Grey) Forged Carbon	Do not use chemical jewelry cleaner. Gently wipe this item clean with a soft cloth and remove any remaining impurities with mild diluted soap and warm water. Avoid contact with abrasive surfaces.	Titanium is resilient, but may show wear over time. Please avoid contact with abrasive materials.
	Black Rhodium	Clean regularly by wiping with a fresh, soft cloth. Take care to remove jewelry at night and before exercise or intense physical activity. Do not apply lotions while wearing.	Black rhodium is a rare type of platinum plated over silver and gold to create a darker hue. Like any plated finish, it will fade over time and with wear. Since salt, chlorine and other solutions can damage this finish, please remove your jewelry before bathing, swimming or washing your hands.
	Silver & Ceramic	Wash with mild soap and water before letting it air dry. Once dried, gently wipe any gold areas with the white side of a DY polishing cloth.	Ceramic coatings are strong, but can be fragile if hit against or dropped on hard surfaces such as concrete, metal or wood. Please protect your jewelry from impact against such surfaces.
	Copper	Use a soft cloth to gently wipe clean, then remove any remaining impurities with mild diluted soap. Rinse with warm water and dry thoroughly before storing in the provided jewelry pouch.	Copper jewelry will acquire a patina over time. To clean the naturally-produced patina, simply use a polishing cloth to remove oils and dirt. The use of anti-tarnishing paper will also help slow down the patina process.
	Platinum	Do not use abrasive cleaners, steamers or ultrasonic machines. Use a soft cloth to gently wipe clean, then remove any remaining impurities with mild diluted soap. Rinse with warm water and dry thoroughly before storing in the provided jewelry pouch.	
Aluminum	Gold	Clean regularly by wiping with a fresh, soft cloth.	Please wear this design with care to avoid scratches.
	Silver	To clean, wipe with a soft, damp cloth or use mild diluted soap and warm water. Dry thoroughly before storing in the provided jewelry pouch.	Please wear this design with care to avoid scratches.
Bronze	Gold	Clean regularly by wiping with a fresh, soft cloth. Take care to remove jewelry at night and before exercise or intense physical activity. Do not apply lotions while wearing.	
	Silver		
	Brass		
Stainless Steel	Gold	Clean regularly by wiping with a fresh, soft cloth.	
	Silver		
	PVD		

Please note: To reduce possible reactions, remove your jewelry at night, avoid wearing during exercise or excessive sweating. Do not apply excessive lotions while wearing.

METAL TYPE	MIXED WITH	CLEANING TIPS	CARE NOTES
Silver	Black Titanium Grey Titanium	Do not use chemical jewelry cleaner. Gently wipe this item clean with a soft cloth and remove any remaining impurities with mild diluted soap and warm water. Avoid contact with abrasive surfaces.	Titanium is resilient, but may show wear over time. Please avoid contact with abrasive materials.
	Black Rhodium Black Oxidation	Do not apply polishing compound or use a coated polishing cloth on black oxidation finishes. Clean regularly by wiping with a fresh, soft cloth.	Black rhodium is a rare type of platinum plated over silver and gold to create a darker hue. Like any plated finish, it will fade over time and with wear. Since salt, chlorine and other solutions can damage this finish, please remove your jewelry before bathing, swimming or washing your hands.
	Brass Platinum Stainless Steel	Clean regularly by wiping with a fresh, soft cloth.	
	Copper	Clean regularly by wiping with a fresh, soft cloth. Take care to remove jewelry at night and before exercise or intense physical activity. Do not apply lotions while wearing.	Copper jewelry will acquire a patina over time. To clean the naturally-produced patina, simply use a polishing cloth to remove oils and dirt. The use of anti-tarnishing paper will also help slow down the patina process.
	Gold	Use the white side of the provided David Yurman polishing cloth to gently wipe clean, then remove any remaining tarnish with mild diluted soap. Rinse with warm water and dry thoroughly before storing the design in its jewelry pouch.	
	PVD	Clean regularly by wiping with a fresh, soft cloth. Please avoid contact with abrasive materials.	
Platinum	Black Titanium Grey Titanium	Do not use abrasive cleaners, steamers or ultrasonic machines. Clean regularly by wiping with a fresh, soft cloth. Please avoid contact with abrasive surfaces.	Titanium is resilient, but may show wear over time. Please avoid contact with abrasive materials.
	Black Rhodium	Do not apply polishing compound or use a coated polishing cloth on black oxidation finishes. Use a soft cloth to gently wipe clean, then remove any remaining impurities with mild diluted soap. Rinse with warm water and dry thoroughly before storing in the provided jewelry pouch.	Black rhodium is a rare type of platinum plated over silver and gold to create a darker hue. Like any plated finish, it will fade over time and with wear. Since salt, chlorine and other solutions can damage this finish, please remove your jewelry before bathing, swimming or washing your hands.

Please note: To reduce possible reactions, remove your jewelry at night, avoid wearing during exercise or excessive sweating. Do not apply excessive lotions while wearing.
